

SANYA MALHOTRA

Toronto, ON • Portfolio: sanyamalhotra.me • sanya.malhotra031@gmail.com • linkedin.com/in/sanya031malhotra

Product Designer with a Computer Science background and 2 years of experience designing web and mobile products for technical users. Experienced in user research, usability testing, interaction design, and responsive product design, with a focus on simplifying complex workflows and collaborating with developers from discovery through handoff.

EXPERIENCE

Bitcoin Dev Project

May 2025 – Jun 2026

Product Designer

Remote

Transcript Review Platform

- Mapped and redesigned **4 end-to-end user flows** from transcript discovery through rewards, identifying friction from developer-first terminology and disconnected states and prioritizing improvements with the team lead and developer based on user impact and development effort.
- Redesigned the transcript claiming flow so contributors could inspect the full editor before committing, while keeping editing locked until claim to give users context before starting the 24-hour review window.
- Reworked the transcript editor around common review tasks after users reported difficulty changing speakers, bringing speaker and video controls into the editing experience and replacing developer terminology with clearer contributor-facing language.

Website Redesign

- Led the end-to-end redesign of a live website, using **moderated usability testing with 6 users** to uncover navigation and resource-discovery problems and restructure the information architecture around user goals.
- Reorganized resources around Learn, Contribute, and Get Funded and surfaced key content earlier in the user journey, contributing to **19% more site visits and an 8% lower bounce rate** in the first month after launch.

BTCPay, Bitshala

Dec 2024 – May 2025

Product Design Intern

Remote

- Redesigned BTCPay's 2FA setup after auditing the authentication user flow and gathering stakeholder feedback, consolidating key steps into a clearer primary container to reduce scrolling and fragmented actions during setup.
- Adapted BTCPay's merchant payment dashboard for responsive mobile use across **3 core experiences**, prioritizing recent and pending payments, sales trends, and top-selling items while simplifying lower-priority information for smaller screens.

Bitcoin.design, Summer of Bitcoin

May 2024 – Aug 2024

Product Design Intern

Remote

- Designed a 0-to-1 Bitcoin UI Gallery to centralize wallet design references scattered across products, using information architecture to organize interfaces into **13 user journeys** for browsing flows, saving references, and building collections.
- Translated the concept into an **MVP of 50+ high-fidelity screens**, iterating on interaction design through feedback and presenting the final product at the fellowship, where **the work led a founder to bring me onto a subsequent Product Design internship**.

Programming Pathshala

Jun 2023 – Aug 2023

UI/UX Design Intern

Remote

- Simplified the course onboarding and free-trial user flow through user-flow analysis, wireframing, and prototyping, reducing cognitive load across the experience and contributing to a **stakeholder-reported 10% increase in user engagement** after launch.
- Redesigned the course landing page and supporting responsive pages alongside 2 designers, improving content hierarchy and visual consistency across the experience, with **stakeholders linking the launched redesign to increased course sales**.

EDUCATION

York University

Toronto, CA

Bachelor of Science in Computer Science

Expected: Oct 2026

Relevant Coursework

EECS 1015 Web Development, EECS 3461 User Interfaces, EECS 3311 Software Design

SKILLS

Design: Figma, Product Design, UX/UI Design, Interaction Design, Prototyping, Wireframing, Responsive Design, Design Systems, Visual Design

Research: User Research, Moderated Usability Testing, Information Architecture, User Flows, A/B Testing, Accessibility (WCAG)

Development: HTML, CSS, JavaScript, Git/GitHub

Product: Cross-functional Collaboration, Requirements Gathering, Workflow Analysis, Stakeholder Collaboration, Developer Handoff
