EXPERIENCE

Bitcoin Dev Project

May 2025 – Jun 2026

Product Designer

Remote

- Improved resource discovery on BDP's website through information architecture, organizing 30+ resources by goal, type, and difficulty, contributing to 19% more visits and 8% lower bounce rate.
- Shipped 20 usability improvements by translating moderated testing findings from 6 users into actionable GitHub issues and collaborating with 2 developers and open-source contributors through implementation.
- Reduced navigation friction across 4 contributor workflows by redesigning interactions, surfacing nested pages, and restructuring information architecture around progression from discovery through rewards.
- Prevented unnecessary 24-hour transcript lockouts on BTC Transcripts Review by introducing transcript preview and withdrawal options, improving reviewer control before claiming.

BTCPay, Bitshala

Dec 2024 – May 2025

Product Design Intern

Remote

- Simplified BTCPay's POS calculator interaction by analyzing patterns across 10 competitor apps and redesigning calculation logic and controls around established interaction patterns.
- Adapted BTCPay Server functionality for mobile across 3 core flows and 5 dashboard modules, prioritizing essential merchant actions for mobile payment management.
- Clarified BTCPay's 2FA setup by simplifying screen hierarchy and instructional copy across multiple design iterations, earning stakeholder approval for the proposed experience.

Bitcoin.design, Summer of Bitcoin

May 2024 – Aug 2024

Product Design Intern

Remote

- Focused a broad product concept into an MVP by translating needs from 3 user personas into prioritized requirements, separating essential functionality from future opportunities.
- Defined 14 end-to-end flows for a Bitcoin UI reference platform, enabling designers to discover, examine, save, and contribute complete product flows beyond isolated screens.

Programming Pathshala

Jun 2023 – Aug 2023

UI/UX Design Intern

Remote

- Redesigned course webpages with a PM and 2 designers, improving content presentation and navigation through iterative feedback and contributing to a 20% increase in sales.
- Simplified course onboarding by analyzing cognitive load in the existing question flow and reducing decision complexity to address user drop-off.

EDUCATION

York University

Toronto, ON

Bachelor of Science in Computer Science

Relevant Coursework

EECS 1015 Web Development, EECS 3461 User Interfaces, EECS 3311 Software Design

SKILLS

Design: Figma, Interaction Design, Prototyping, Wireframing, Responsive Design, Visual Design, Component Libraries

Research: UX Research, Usability Testing, Information Architecture, User Flows, Accessibility

Product: MVP Scoping, Product Requirements, Developer Handoff, Design Documentation

Technical: HTML, CSS, JavaScript, Git/GitHub
